Vaibhav Panchal

Junior AI/ML Developer @ TestGrid Labs Inc. | AI/ML Enthusiast |
Computer Vision | Deep Learning | Automation | AI Research
Navsari, Gujarat, India

Summary

Aspiring Software Developer | AI/ML Enthusiast | Jr. AI/ML Developer at TestGrid.io I am currently pursuing my Master's in Software Engineering at L.D. College of Engineering, where I have built a strong foundation in Machine Learning, Artificial Intelligence, Data Science, Advanced Data Structures, Image Processing, and Mathematics fundamentals. Currently, I am working as a Jr. AI/ML Developer at TestGrid.io, where I am expanding my expertise in AI-driven solutions, automation, and modern software development practices. Previously, I completed a 3-month internship at Techreale, where I worked on a healthcare-related project and gained hands-on experience with React JS, MUI, Postman, GitHub, HTML, and CSS. In 2022, I participated in the SSIP program, where I designed and developed a School Management System using PHP. This experience strengthened my problem-solving abilities and enhanced my understanding of building practical, real-world software solutions. I am passionate about exploring emerging technologies, solving real-world problems, and collaborating on innovative projects that create meaningful impact. I continuously strive to improve my technical and analytical skills while growing as a software engineer and AI/ML developer. Outside of academics and development, I enjoy learning new programming languages, gaming, music, and movies. Let's connect to discuss software development, AI/ML, automation, and innovative tech opportunities!

Excited to Start My Professional Journey!

I'm happy to share that I have joined TestGrid Labs Inc. as a Junior AI/ML Developer starting from May 2026.

This opportunity marks an important step in my career, where I'll be working on AI-driven solutions and contributing to innovative testing technologies.

Looking forward to learning, growing, and building impactful solutions with an amazing team.
