Examination	University	Institute	Year	CGPA/%
Post-Graduation	GTU(SE)	LDCE Ahmedabad	2024-2026	7.95
Graduation	GTU(CS)	GDEC Navsari	2020-24	8.11
HSC	GSEB	AB School	2020	72
SSC	GSEB	AB School	2018	69

PROJECTS

- **Movie Recommendation System** (Jan'25-Feb'25)
 - Developed a content-based movie recommender using the TMDB 5000 dataset. Engineered features by combining metadata (genres, cast, director, overview, keywords) and applied TF-IDF vectorization with cosine similarity to computed movie similarities. Built an interactive front-end using Streamlit for real-time recommendations. Focused on scalability, clean UI, and accurate suggestions.
 - **Tech Stack:** (Python, Pandas, NumPy, Scikit-learn, TF-IDF, Cosine Similarity, Streamlit)
- **Famyll: A Comprehensive Healthcare Platform** (Jan'24-March'24)
 - Built a feature-rich web application that streamlines communication among Plan Owners, Members, Providers, and Admins. Designed an intuitive, user-centric interface to manage healthcare coverage, claims, and preventive care. Implemented secure authentication, personalized profiles, and efficient claim processing to enhance the overall patient-provider experience.
 - Key Features: Secure login, password recovery, claim management, preventive exam scheduling, real-time provider-member communication.
 - **Tech Stack:** (React Js, Node.js, MongoDB, Postman API)
- **Intrusion Detection System using Machine & Deep Learning** (April'25-May'25)
 - Designed a hybrid Intrusion Detection System to classify network traffic as benign or attack using machine learning and deep learning models. Implemented dimensionality reduction (PCA), feature compression (AutoEncoder), and advanced architectures including CNN, BiLSTM, and MultiHead Attention. Evaluated models using precision, recall, and F1-score for optimized accuracy and low false positives.
 - Key Achievements: Achieved 98.4%+ accuracy with CNN + BiLSTM + MultiHead Attention, Integrated Random Forest and SVM for comparative benchmarking, Applied PCA and feature selection to reduce computation and training time
 - **Tech Stack:** (Python, Scikit-learn, TensorFlow/Keras, NumPy, Pandas, Matplotlib)

TECHNICAL SKILLS

- **Programming & Scripting Languages:** C, C++, Java, HTML, CSS, JavaScript, Python, PHP.
- **Tools & Libraries:** ReactJS, NodeJS, MongoDB, Firebase, Android, SQL, Postman.

WORK EXPERIENCE & INTERNSHIPS

- **Trainee Associate Software Developer at Techreale PVT.LTD in Valsad** (Jan'24-April'24)
 - Assisted in developing, testing, and debugging software applications to ensure quality and functionality.
 - Collaborated with teams to integrate APIs and create user-friendly, responsive interfaces.
 - Gained hands-on experience with Agile methodologies and version control systems like Git.
 - Contributed to troubleshooting and resolving software issues efficiently.
- **React Developer Intern at INFOLABZ IT SERVICES PVT. LTD in Ahmedabad** (July'23-Aug'23)
 - Enhanced proficiency in using React, a fundamental framework for web development.
 - Gained hands-on experience in building responsive and interactive user interfaces.
 - Acquired the ability to handle state management effectively in React applications.
 - Improved skills in debugging and optimizing React applications for better performance.
 - Strengthened knowledge of asynchronous JavaScript and its application in API calls.

ACHIVEMENT

- Participated SSIP Hackathon 2022 – Developed a smart e-Hajiri-Master solution for attendance management problem.

AREA OF INTEREST

- AI/ML-LLM, RAG
- Cloud Computing
- Data Science & Analytics

HOBBY

- Coding
- Playing Chess
- Learning new technologies
